

'FREE Electricity'

Really? Too good to be true, or not?

Tuesday 15th February 7.30 – 9.00pm
Thatcham Town Football Club
Crookham Hill, Thatcham RG19 4PA

Have you seen advertisements or received phone calls from companies offering to sell you solar panels, or even fit solar panels on your roof for free and telling you that you will get free electricity as a result? Sounds too good to be true?

- Are you wondering what the **'Feed-in tariff'**, is really about?
- Do you want clarity about what the government is offering to householders and whether you can really make money from it?
- Are you wondering if your house is suitable for electricity generation from your roof using the sun?
- Do you want to find out what a photovoltaic (PV) system looks like?
- Are you wondering how you can have renewable energy on your roof without paying any money?
- Or do you just want to find out a bit more on what this is all about?

Come and join us to learn this and more from a panel of people who are either experts on solar power, or who have had it installed themselves so have the experience.

Householders **can** reduce their carbon footprint, their bills and **can make money** from these offers, but you need to know the facts and **you need to understand the different offers out there at the moment.**

This evening will help you do that. It's arranged by the Greening Campaign. It's free, the advice is impartial and no-one will be trying to sell you anything!
